

When looking for insurance, there are so many options it can be a bit dizzying. Luckily, Streetlight Insurance Brokers can help you through that process. “If you can insure it, we can do it,” said President E. John Dusio. Dusio said Streetlight is not owned by any companies and has access to regional and national carriers. That means he can get each person that walks through his door the best coverage for them.

“We believe in a long-term relationship,” said Dusio.

Dusio said when you walk in the door, you can expect face to face service.

He also has double monitors so you can see exactly what he is doing on the computer, and what your options are.

He said most of the time people want the cheapest coverage coming in, but not when something happens.

So, he helps you find the right coverage for you at an affordable price.

“We are absolutely transparent,” said Dusio.
