Houston's Meat and Produce is continuing to expand its kitchen, now adding fresh grilled burgers and fries.

What makes Houston's burgers different is that they come from the meat room inside the store, and are never frozen. The meat is ground right in the store, and cooked while you wait.

Chris Houston said another reason they wanted to do it is because it gives north siders more burger options.

"There are not a lot of places known for their burgers on this side of a town," said Houston.

You can still get all the favorites at Houston's as well. Taco salads are on Thursdays, steak sandwiches on Fridays and smoked ribs on the weekends. You can also get their famous chicken salad as well.

If you are interested in catering an event, Houston's can handle 20 people to 1,000 any day of the week.

Houston's Meat & Produce is located at 3930 N. Mt. Juliet Road. They can be reached at (615)758-7226.

Houston's now has fresh grilled hamburgers and fries
